PROFILE

I bring structure to complex digital products. I turn fragmented interfaces, libraries, and workflows into coherent design systems that teams can maintain and scale. I have 20 years in design, including 5+ years focused on design systems across web and mobile products.

EXPERIENCE

Design System Designer | May 2022 - Present

Muse Group | Remote

- Co-architected a shared Design System for six product systems across Web and App; became the primary Figma maintainer for shared libraries containing 4,300+ components and variants.
- Designed one semantic color architecture for six products, including four with theming, and helped standardize interaction states through a shared opacity model.
- Consolidated 1,136 icon assets from five libraries into one maintained set of 260 icons now used by seven products; owned inventory, visual direction, rules, taxonomy, and ongoing governance.
- Built a repeatable accessibility framework spanning product audits, ownership, prioritization, Design System requirements, and VoiceOver testing; embedded improvements in color, typography, hit areas, and components.
- Designed most shared Foundation components and helped define the layered model that separates reusable Web and App foundations from product-specific UI, allowing later products to adapt the system instead of starting from scratch.

Design System Designer | May 2021 - May 2022

Cian | Remote

- Interviewed around 30 stakeholders, defined a nine-part Design System roadmap for an organization of around 20 designers, and completed seven initiatives within one year.
- Introduced a shared 4 px dimensional foundation, aligned typography and component sizing, refactored core components, and documented foundations and usage rules.
- Unified Web, iOS, and Android color libraries into one semantic model supporting seven themes and clear implementation guidance.
- Reduced the shared icon inventory from 545 to 342 assets, redrew about 70%, and replaced platform-specific production logic with one cross-platform source.
- Led a contact-system pilot that consolidated 4-5 snippet implementations and about two sidebar variants into three controlled variants; the web model was released and remains in use.

Vitalii Kapustianov

EXPERIENCE

Senior Product Designer | Jul 2019 - May 2021

Orbitum Labs | Part-time | Remote

- Designed mobile and iPadOS products for a veterinary-clinic network, including user flows, stylus-friendly forms, prototypes, and reusable UI libraries.
- Maintained design quality through production across components, color, typography, and iconography.

Senior Product Designer | Apr 2019 - May 2021

Karuna Group | Full-time

- Sole designer for a multilingual trading product with 10M+ downloads across iOS and Android, working with six developers and two QA specialists.
- Rebuilt the design infrastructure during the Sketch-to-Figma migration: separated platform files, created shared color and asset libraries, and introduced trusted Dev and Prod sources.
- Moved localization for 12 languages from manual spreadsheets to an automated Lokalise workflow, then delivered the redesign on top of the new system.

Senior Product Designer | Jul 2017 - Mar 2019

Devim | Full-time

- Designed fintech web and mobile products, built internal design systems, and mentored junior designers.

EARLIER EXPERIENCE

Product Designer | 2013 - 2017

Group M | Full-time

Web interfaces, internal tools, visual identity, marketing, and team coordination.

Graphic and Web Designer · 2006 - 2013

Independent and agency work

Identity, print, outdoor, and web projects for agencies, local businesses, and L'ecole Roche Business School.

CORE SKILLS

System architecture

Design system audits · Library architecture · Design foundations · Design Tokens · Theming · Component Libraries · Cross-platform systems

Governance and adoption

Design System Governance · Contribution workflows · Documentation · Design QA · Accessibility (WCAG 2.1 AA) · Design-engineering alignment

Product and visual craft

Interface design · Prototyping · Iconography · Mobile and web products

Tools

Figma · Figma Variables · FigJam · Storybook · Supernova · Notion · Lokalise · HTML/CSS

EDUCATION

Advertising and Visual Communication

Saratov State Technical University | 2006 - 2010

Editorial Design and Desktop Publishing

Saratov State College of Design and Information Technology | 2002 - 2006

MENTORING

ADPList mentor in design systems and product design · Top 50 Design Operations, June 2025
